

STAFF HANDBOOK

Zeal Clinic User Guide

Everyday workflows for clinic staff

Patients | Appointments | Billing | Inventory | Team

Application version 1.1.0

How to use this guide

This guide explains the screens and workflows clinic staff use in normal daily work: reception, clinicians, finance and managers. It does not explain installation, servers, databases or other technical setup.

Screens and permissions: The screenshots use demonstration data: every patient, staff member and amount in them is invented. Menus, tabs, buttons and dashboard cards appear only when your role has permission to use them, so your screens may show fewer options.

The normal daily path

1. **Sign in.** Use the account provided by your clinic administrator.
2. **Find or add the patient.** Search first to avoid duplicate records.
3. **Book the appointment.** Choose a room, procedure, date and time.
4. **Run the visit.** Mark it In-Progress, then Completed.
5. **Bill the patient.** Create the invoice and record the payment.
6. **Finish securely.** Review alerts and log out when leaving the workstation.

Contents

Chapter	What it covers
1. Getting started	Sign in, the workspace, lists, search, display settings, phones and tablets
2. Patients	Patient records, clinical history, prescriptions, balances
3. Appointments	Calendar, booking, rescheduling, statuses, completion
4. Billing	Invoices, payments, refunds, offers, gift cards, expenses
5. Catalog and suppliers	Inventory, suppliers, services and prices, allergy conflicts
6. Team and HR	Employees, weekly schedules, time off, overtime, salaries, holidays
7. Dashboard and reports	Daily overview, reports, notifications, connecting another device
8. Administration	Staff accounts, roles, audit log, updates, cloud sync
9. Help	Common problems and messages, safe deleting, end-of-shift checklist

What's new in version 1.1.0

- **The week runs Monday to Sunday:** in the calendar's Week view, the printed week schedule, the date pickers and every staff schedule.
- **Records in use are protected:** the app refuses to delete a record that other records still depend on and says so in its own words, for example “Can't delete patient while it's in use” or “Can't delete room while it's in use”.
- **Money history is kept:** a patient, employee, supplier or expense with any invoice, payment or balance entry, even one that was deleted later, can no longer be deleted. Keep the record and correct it with Edit.
- **Clearer messages:** when the app can't save something it says why, for example “This room is already booked for that time”, “Not enough stock for ...”, “Invoice number ... already exists” or “Please check your input”, instead of a general error.
- **Alerts tidy themselves:** a low-stock alert disappears from every open screen as soon as the product is restocked.

CHAPTER 1

Getting started

Sign in, understand the workspace, and move around confidently.

Sign in

A screenshot of the Zeal Clinic sign-in interface. It features a light gray background with a central white rounded rectangle containing the login fields. At the top is the Zeal Clinic logo, a stylized 'Z' in an orange square. Below the logo is the text 'Zeal Clinic' and 'Sign in to your account to continue'. There are two input fields: 'Username' with the placeholder 'Enter your username' and 'Password' with the placeholder 'Enter your password' and a toggle eye icon. A dark blue 'Sign in' button is at the bottom.

Sign in with the username and password provided by your administrator.

1. **Open Zeal Clinic.** Use the clinic bookmark or address supplied by your administrator.
2. **Enter your username.** Type it exactly as it was provided.
3. **Enter your password.** The eye button shows what you typed; use it only when nobody else can see the screen.
4. **Select Sign in.** The dashboard opens after the account is verified.

First sign-in: An account created without a password saves the password entered at its first successful sign-in. Only do this when your administrator has told you the account is ready, and use a strong private password.

One sign-in per tab: Each browser tab signs in on its own, so a new tab opens at the sign-in page. A session also ends by itself after a set time; sign in again when asked.

Sign out

Select your initials at the top right, then select Logout. Always log out before leaving a shared workstation. Logging out also removes unfinished drafts kept on that computer.

Your workspace

The main workspace: sidebar, page title, search, Quick Action, notifications and the staff menu.

Area	How to use it
Sidebar	Open Dashboard, Schedule, Patients, Suppliers, Financials, Team, Inventory, Services, Reports, Settings or Connection. The button beside the page title (or Ctrl+B) folds it down to icons.
Page tabs	Switch between related lists, such as Patients / Allergies / Medicines or Invoices / Expenses / Discounts / Currencies.
Search	Find patients, employees, suppliers, procedures and products from any page.
Quick Action	Start a new patient, appointment or invoice without leaving the current page.
Bell	Read alerts, mark them read, or remove them.
Staff menu	Your initials: adjust the scale, open My Profile, switch between dark and light mode, or log out. The small dot on your initials shows the live connection; point at it to read its state.

If something is missing: A missing section or button usually means your role does not have access. Ask an administrator to review your role; do not use another person's account.

Working with lists

- **Search:** the Search box above a list narrows it as you type.
- **Filter:** some lists, such as Patients and the Audit Log, can be limited to a date range. Choose From and To, then Apply; Clear removes the range.
- **Sort:** select a column heading to sort by it; select it again to reverse the order.
- **Row actions:** the ... button at the end of a row holds actions such as Edit and Delete. Selecting the row itself opens the record.
- **Pages:** long lists show 100 rows at a time, with page buttons at the bottom.

Search and quick actions

Search before creating

1. **Select the Search box.** Type part of a name, phone number, email, procedure or product name.
2. **Check the result group.** Results are grouped as Patients, Employees, Suppliers, Procedures and Products, up to five of each. You only see the groups your role can open.
3. **Select the result.** Its detail page opens.

Search groups its results by kind of record, with contact details where they help.

Quick Action opens the three most common create workflows.

Use Quick Action when you already know what you need to create. If you are working inside a patient record, use the plus button in that section so the patient is filled in automatically.

Selection lists that show a plus button (Add new) let you create a missing item on the spot, for example a new patient while booking an appointment, when your role allows it.

Display preferences

- **Scale:** move the slider in the staff menu (80% to 170%) to make everything larger or smaller.
- **Dark mode / Light mode:** choose whichever is easier to read in the room. The app starts in dark mode; your choice and your scale are remembered on that computer.
- **My Profile:** view your own details. When your account is linked to an employee record it also shows your schedule, salaries, payments and assigned appointments, and you can request time off or overtime from your schedule.

The staff menu: scale, My Profile, dark or light mode, and Logout.

On a phone or tablet

On a narrow screen the sidebar hides behind the menu button at the top left, Search becomes a magnifier button and Quick Action a plus button. The forms that keep drafts show them behind a Drafts button above the form.

CHAPTER 2

Patients

Create one reliable record and use it as the patient's complete working history.

Find and add a patient

The screenshot shows the Zeal Clinic app interface. On the left is a sidebar menu with icons and labels for various sections: Dashboard, Clinical (Schedule, Patients), Business (Suppliers, Financials, Team), Catalog (Inventory, Services), and System (Reports, Settings, Connection). The main area is titled 'Patients' and features a search bar at the top. Below the search bar are tabs for 'Patients', 'Allergies', and 'Medicines'. The 'Patients' tab is active, displaying a list of patients with columns for Name, Contact, Email, and Date of Birth. The list includes names like Alexander Donovan, Alexander Keller, Alexander Parker, Alice Carter, Amelia Foster, Amelia Gibson, Amelia Hayes, Amelia Keller, Arthur Evans, Arthur Sinclair, Arthur Zimmerman, Beatrice Parker, Benjamin Bennett, Benjamin Palmer, and Brian Donovan. At the bottom of the list, it says '1-100 of 152' and 'Page 1 of 2' with navigation arrows.

The Patients list supports search, a date filter, sorting, pages and New.

1. **Open Patients > Patients.** Use the list's Search box or the global search first.
2. **Select New.** You can also use Quick Action > New Patient.
3. **Complete the required fields.** First name, last name, gender and contact are required; required fields are marked with an asterisk.
4. **Add useful optional details.** Date of birth, email, emergency contact, weight, height, blood type, country and address, Referred By, Referral Source and notes help future visits. The form warns when the date of birth makes the patient under 18.
5. **Select Create.** If most optional details are empty, the app asks you to confirm first. The new record is then available throughout the app.

Avoid duplicates: Search by name and contact number before adding anyone. A duplicate patient separates appointments, prescriptions, invoices and balances into different histories.

Drafts: While you type, New Patient keeps an automatic draft in the Drafts panel on the left of the form. If you are interrupted, open New Patient again and select the draft to continue. Drafts stay on that computer until you log out.

Use the patient record

-------------	------	--------

Balance: \$105.00 In: \$180.00 · Out: \$0.00

Payments [Add] [More]

A patient record brings details, clinical history, appointments, prescriptions, invoices and payments together.

Section	What staff can do
Details	Review contact, emergency contact, date of birth, address, weight, height, blood type and notes. Use Edit at the top to correct them.
Allergies	Add, edit or remove the patient's known allergies. Products and procedures can list allergy conflicts too.
Medicines	Record medicines the patient is currently taking, with notes.
Appointments	Add an appointment with the plus button, or select a visit to view it; Open in Schedule jumps to that day in the calendar.
Prescriptions	Choose who prescribed it, the start date and optional end date, and one or more medicines with instructions.
Invoices	Create a patient invoice or open an existing one.

Section	What staff can do
Payments	Record payments. The ... button beside the plus adds an adjustment, a write-off or a refund.

Record an allergy, medicine, or prescription

The screenshot shows the Zeal Clinic software interface for a patient named Dr. Julian Vance. The left sidebar contains navigation links: Dashboard, Clinical (Schedule, Patients), Business (Suppliers, Financials, Team), Catalog (Inventory, Services), and System (Reports, Settings, Connection). The main area displays patient information and several data entry sections, each with a plus button for adding new records:

- Allergies:** A table with columns 'Name' and 'Notes'. It lists 'Fragrance' and 'Retinoids'.
- Medicines:** A table with columns 'Name' and 'Notes'. It lists 'Hydrocortisone 1% Cream' with the note 'Ongoing'.
- Appointments:** A table with columns 'Procedures', 'Date', 'Time', and 'Status'. It lists 'Face Skin Boosters, Prothilo Face' on '2026-09-19' at '12:00 PM - 1:00 PM' with a 'Cor' status.
- Prescriptions:** A section with the text 'No data yet.'
- Invoices:** A table with columns 'Invoice No.', 'Date', and 'Amount'. It lists invoice '#8' dated '2026-09-19' for '\$285.00'.
- Balance:** A card showing 'Balance: \$105.00' with 'In: \$180.00' and 'Out: \$0.00'.
- Payments:** A table with columns 'Date', 'Method', 'Description', and 'Amount'. It lists a payment on '2026-09-19' via 'Card' for 'Patient payment' of '+\$180.00'.

Allergies, medicines, appointments and prescriptions each have their own plus button.

1. **Select the plus button.** Use the plus in Allergies, Medicines or Prescriptions.
2. **Choose the item from the list.** If it is missing and you have permission, create it with the list's Add new button.
3. **Add notes or instructions.** For prescriptions, also choose Prescribed By and the start date.
4. **Select Add (or Create for a prescription).** The entry appears in the patient's record.

Clinical safety: Confirm allergies, current medicines and prescription instructions with the patient or clinician before saving. The software records information; it does not replace clinical judgement.

Patient balances and payments

The Balance card beside Invoices shows what the patient owes. A positive balance is money owed to the clinic; a balance with a minus sign is credit the clinic holds for the patient, for example from a gift card.

- Schedule - Patients - Business - Suppliers - Financials - Team	Invoices +			Balance: \$105.00 In: \$180.00 - Out: \$0.00		
	Invoice No.	Date	Amount	Payments + ...		
	#8	2026-09-19	\$285.00	Date	Method	Description
				2026-09-19	Card	Patient payment
						+\$180.00

Invoices, the balance and the payments list at the bottom of a patient record.

1. **Open the patient record.** Scroll to Invoices and Payments.
2. **Create an invoice first.** Use the plus in Invoices unless the invoice already exists.
3. **Record the payment.** Use the plus in Payments, enter the amount, the transaction method and a description, then select Record Payment.
4. **Check the balance.** Confirm the payment appears and the balance changed as expected.

How In and Out are shown: On patient, supplier and employee balance cards, In and Out are displayed from that person's or organization's perspective. They can therefore look opposite to the clinic's cash movement.

Refund, adjustment, and write-off

Open these from the ... (Payment actions) button next to the plus in Payments.

- **Refund:** use when the clinic returns money to the patient. Enter the amount, method and a clear description, then select Record Refund.
- **Adjustment:** use only to correct a balance when the real amount is known but no normal invoice or payment applies. Choose the direction (Incoming or Outgoing) and write a description.
- **Write-off:** use only when the clinic intentionally removes an amount from the balance.

Financial control: Adjustments, write-offs, refunds and deleted payments change the financial record. A deleted payment stays in the history, and a patient with any money history can no longer be deleted. Follow clinic approval rules and always enter a useful description.

CHAPTER 3

Appointments

Book, move, start, complete, or cancel a visit without losing its history.

Read the calendar

Day view places appointments by time and room. Switch to Week, or to Table for a list of the day.

- **Day / Week:** Day shows the room timetable. Week shows Monday to Sunday with the number of appointments in each room per day; select a day to open it.
- **Arrows, date and reset button:** move back or forward a day (or a week), pick a date from the calendar, or return to today.
- **Calendar / Table:** in Day view, switch between the timetable and a list of the day with patient, balance, procedures and status. Cancelled visits appear only in the list.
- **Print:** the ... (Day actions) button prints the day; the printer button in Week view prints the week.
- **Holidays:** a clinic holiday shows as a badge on its day.
- **Rooms:** maintain room names and types (Consultation, Procedure, General or Hospital) under Schedule > Rooms if permitted. A hospital room is highlighted on the days it is booked.
- **Appointment card:** select a card to view or edit it.

Notes
Initial consultation and aesthetic assessment.

Cancel Create

The New Appointment form: patient, room, a procedure with its assigned employee, times and notes.

1. **Start the form.** Use Quick Action > New Appointment, select an empty hour in Day view (the room and time are filled in), or use the plus in the patient's Appointments section.
2. **Select the patient.** When started from the patient record, it is already filled in.
3. **Select the room.** The app refuses a second active booking for the same room and time with “This room is already booked for that time”.
4. **Add at least one procedure.** Assign an employee now if known; every procedure needs one before the visit can start.
5. **Set the date and times.** Appointments last at least 15 minutes and may end on the following day at the latest. The form warns when the start time has already passed.
6. **Add notes and select Create.** The appointment begins with Scheduled status.

Edit, move, or reschedule

- **Update details:** open the appointment, change the room, procedures, employees, times or notes, then select Update. The patient can't be changed.
- **Reschedule from the form:** changing the date or time shows a Reschedule button. Enter a reason and select Confirm Reschedule.
- **Drag on the calendar:** in Day view, drag an appointment to a new time or room, then choose Save for a direct change, or Reschedule (offered when the time changed) to record a reason. Completed visits can't be dragged.

Reschedule history: Reschedule marks the original appointment as Rescheduled and creates a new active booking linked to it. This preserves the history and removes the old time from the active calendar.

Appointment statuses

Status	Meaning and next action
Scheduled	The visit is booked. Edit it, reschedule it, mark it In-Progress, complete it, or cancel it.
In-Progress	The visit has started and every procedure has an assigned employee. Complete it, cancel it, or return it to Scheduled.
Completed	The visit is finished. It opens read-only with its completion notes; Edit is still available to staff who may change appointments.
Cancelled	The visit will not happen. It leaves the room timetable but stays in the Table list and the patient's history. It can be returned to Scheduled if the room is still free.
Rescheduled	The replaced booking, kept for history. The new booking is active at its new date and time. It can't be returned to Scheduled.

Start a visit

1. **Open the Scheduled appointment.** Select the status badge at the top of the dialog.
2. **Choose In-Progress.** Assign an employee to every listed procedure.
3. **Select Confirm.** The status changes and the work appears in that employee's schedule and performance figures.

Cancel a visit

1. **Open the appointment.** Select the status badge and choose Cancelled.
2. **Enter the reason.** Use a clear operational reason, without unnecessary sensitive detail.

3. **Select Confirm Cancellation.** The appointment leaves the room timetable but stays in history.

Return a visit to Scheduled

If a status was set by mistake, select the status badge, choose Scheduled and select Confirm. For a cancelled visit, check first that the room is still free; for a completed one, any invoice or payment already recorded stays as it is.

Complete the visit and continue to payment

The completion wizard can finish the visit alone or continue through invoice and payment.

1. **Open the appointment.** Select the status badge and choose Completed.
2. **Add completion notes.** Record useful visit notes according to clinic policy.
3. **Choose Complete.** Use this when no billing is needed now.
4. **Or choose Complete & Continue.** The wizard moves on to Invoice, then Payment.
5. **Create the invoice.** The patient and the visit's procedures are filled in at their current prices. Check the items and any approved discount, then select Create Invoice & Continue, or Close to bill later.
6. **Record the payment or finish.** The amount starts at the invoice total. Select Record Payment, or Finish if payment will be handled later.

The screenshot shows a 'Complete Appointment' dialog box with a close button (X) in the top right corner. At the top, there are three progress steps: 'Complete' with a checkmark, 'Invoice' with a checkmark, and 'Payment' with a circled '3'. Below the progress bar, the 'Patient *' dropdown menu is set to 'Brian Townsend'. The 'Amount *' field contains '\$ 250' and the 'Transaction Method' dropdown menu is set to 'Cash'. There is a large empty text area for 'Description'. At the bottom right, there are two buttons: 'Finish' and 'Record Payment'.

The Payment stage starts at the invoice total.

Invoice and payment are separate: Creating an invoice records what is owed. Recording a payment records what was received. Complete both steps when the patient pays at the visit.

CHAPTER 4

Billing and financials

Create accurate invoices, record money movement, and print clear records.

A client invoice can hold products, procedures, gift cards and other items; a draft is kept while you work.

1. **Open New Client Invoice.** Use Quick Action > New Invoice, Financials > Invoices > Patient > New, or the plus in the patient record's Invoices.

2. **Leave Auto ticked.** Enter an invoice number yourself only when clinic policy requires it; a number that is already used is refused.
3. **Select the patient.** It is filled in automatically from a patient record or an appointment.
4. **Add items.** For each item choose the Type (Product, Procedure, Gift Card or Other), then the item. Prices fill in from the catalog; enter the quantity for products. Use Add Item for more lines.
5. **Apply an approved offer if needed.** Choose it under Invoice Discount; the subtotal, discount and total update.
6. **Review the total and select Create Invoice.** Open the invoice afterwards to print it.

Drafts: New Client Invoice saves a draft automatically in the Drafts panel while you work. To finish one, open the form, select the draft, and check prices and patient details first. Delete drafts you no longer need; all drafts are removed when you log out.

Stock: Selling a product lowers its stock. If there isn't enough, the invoice is refused with "Not enough stock for ...", showing how many are left.

Invoice #499

Print PDF Edit Delete

Details

To: Harriet York Date: 2026-09-29

Notes: ---

Created By: Thomas Mercer

Items

Type	Name	Notes	Quantity	Amount
Procedure	Restoration, PRP Hair Restoration	---	1	\$250.00
Product	Post Laser Repair Balm	---	1	\$35.00

Total **\$285.00**

An invoice shows who it is for, its items and totals, with Print PDF, Edit and Delete at the top.

1. **Open Financials > Invoices.** Choose Patient or Supplier to see that list.

2. **Select an invoice row.** Review who it is to (or from), the date, notes, who created it, the items, subtotal, discount and total.
3. **Select Print PDF.** The printable invoice opens in a new browser tab.

Edit on an invoice changes its notes; on supplier invoices, each item's amount can also be corrected with Edit Amount.

Record a payment

1. **Open the patient's or supplier's record.** Go to the Payments section.
2. **Select the plus button.** Enter the amount, transaction method and a useful description.
3. **Select Record Payment.** Check the new row and the resulting balance.

Financials tabs

Tab	Purpose
Invoices	Patient and supplier invoices. Patient invoices sell procedures, products, gift cards and other items; supplier invoices receive stock.
Expenses	Named expenses, such as rent or utilities. Open one to record its payments.
Discounts	Offers and gift cards: create offers, activate or deactivate them, and redeem gift cards.
Currencies	The list of currencies and exchange rates, kept for reference.

Amounts are in US dollars: Every amount, balance and report is recorded in US dollars. The exchange rates in Currencies are kept for reference and don't convert any amount.

Offers, gift cards, and expenses

The screenshot shows the Zeal Clinic app interface. The top bar includes the Zeal Clinic logo, a search bar, and a 'Quick Action' button. The left sidebar lists various app sections: Dashboard, Clinical, Schedule, Patients, Business, Suppliers, Financials (selected), Team, Catalog, Inventory, Services, System, Reports, Settings, and Connection. The main content area is titled 'Financials' and contains tabs for Invoices, Expenses, Discounts (selected), and Currencies. Below these tabs is a sub-header for 'All Offers Gifts' with a search bar and 'Redeem Gift' and '+ New' buttons. The main table displays a list of offers and gift cards.

Name	Type	Value	Code	Period	Status
Spring Botox -20%	Offer	20%	---	2026-09-14 → 2026-10-29	Active
\$50 off	Offer	\$50.00	---	2026-09-14 → 2026-10-29	Active
Demo Gift Card \$100	Gift	\$100.00	GIFT-DEMO-001	---	Active
Gift Card \$50	Gift	\$50.00	GIFT-28753	---	Active
Gift Card \$100	Gift	\$100.00	GIFT-72816	---	Active
Gift Card \$100	Gift	\$100.00	GIFT-52277	---	Redeemed
Gift Card \$50	Gift	\$50.00	GIFT-39230	---	Active
Gift Card \$150	Gift	\$150.00	GIFT-79563	---	Redeemed
Gift Card \$100	Gift	\$100.00	GIFT-76390	---	Redeemed
Gift Card \$100	Gift	\$100.00	GIFT-76778	---	Redeemed

The Discounts tab lists offers and gift cards, with Redeem Gift and New.

- **Offer:** a percentage or fixed discount, created with New on the Discounts tab. It can be applied to an invoice while its status is Active; after its end date the app switches it to Inactive by itself.
- **Gift card:** sold on a patient invoice as a Gift Card item. Choose Code for a card with a printed code (the shuffle button makes a random one), or Apply to recipient to credit a patient's balance straight away.
- **Redeem Gift:** on Financials > Discounts, select Redeem Gift, enter the code and the patient, then select Redeem. The value is credited to that patient's balance; each code works once.

Expenses

1. **Open Financials > Expenses and select New.** Give the expense a clear name and notes.
2. **Open the expense.** Its Payments list shows what was paid.
3. **Record a payment.** Use the plus in Payments, enter the amount, method and description, then select Record Payment. The ... button adds an adjustment or a write-off.

Delete carefully: Deleting an invoice, payment, expense or discount can change balances, stock or reports. Deleted invoices and payments stay in the history, and the app refuses deletes that would break other records, such as an invoice whose gift card was already redeemed. Prefer correction through the approved workflow and confirm the target before deleting.

CHAPTER 5

Inventory, suppliers, and services

Keep the clinic's sellable items, purchased stock, procedures, and safety conflicts current.

Inventory

Name	Category	Stock	Unit Price
Botox Vial 100u	Injectables	40	\$280.00
Cooling Gel Pack	Post Treatment	17	\$12.00
HA Filler 1ml	Injectables	26	\$160.00
Hyaluronic Acid Cream	Skincare	0	\$55.00
Microneedling Cartridge	Devices	95	\$9.00
Post Laser Repair Balm	Post Treatment	69	\$35.00
Retinol Night Serum	Skincare	32	\$60.00
SPF 50 Mineral Cream	Skincare	83	\$38.00
Skin Booster 2ml	Injectables	16	\$190.00
Vitamin C Serum	Skincare	17	\$45.00

Inventory > Products lists each product with its category, stock and unit price.

1. **Open Inventory > Products.** Search the list or select New.
2. **Enter product details.** Name and unit price are required; category, quantity and minimum threshold keep the catalog organized and drive low-stock alerts.
3. **Open the product record.** Review its price, stock, minimum threshold, allergy conflicts, the invoices that bought or sold it, and its pricing history.
4. **Maintain Categories.** Use Inventory > Categories; a category can sit under a parent category.

Stock movement: A supplier invoice with product items increases stock. A patient invoice with product items decreases it. When stock reaches the minimum threshold, a “Low stock” alert appears; it clears by itself once the product is restocked. Confirm quantities before creating or deleting either kind of invoice.

Allergy conflicts

Product and procedure records can list allergy conflicts. Use these links to make known risks visible during patient work, and keep notes specific and readable.

Suppliers and services

Suppliers

The screenshot shows the 'Suppliers' management page in the Zeal Clinic system. The sidebar on the left contains various navigation icons and labels. The main content area features a table titled 'Suppliers' with a search bar and a '+ New' button. The table lists three suppliers with their respective contact information and creation dates.

Name	Contact	Email	Address	Created
Apex Medical Supplies	+1 555 0110	orders@example.com	Beirut, Lebanon	2026-09-29
Nova Derma Products	+1 555 0111	info@example.org	Jounieh, Lebanon	2026-09-29
Precision Laser Parts	+1 555 0112	support@example.net	Dbayeh, Lebanon	2026-09-29

Suppliers lists each supplier with contacts, email and address.

1. **Open Suppliers and select New.** Enter the name, one or more contacts and emails (press Enter after each), the address and notes.
2. **Open the supplier record.** Create supplier invoices and payments with the plus buttons.
3. **Create a supplier invoice.** Add products, quantities and purchase amounts. Stock increases when the invoice is created.
4. **Record the payment and check the balance.** Use the supplier's Payments section and check the change.

Services and the price list

The screenshot shows the 'Services' section of the Zeal Clinic interface. The left sidebar contains navigation links: Dashboard, Clinical, Schedule, Patients, Business, Suppliers, Financials, Team, Catalog, Inventory, Services (highlighted), System, Reports, Settings, and Connection. The main content area is titled 'Services' and features a search bar and tabs for 'Procedures', 'Types', and 'Categories'. The 'Procedures' tab is active, displaying a table of procedures. The table has columns for Type, Category, Name, and Price. The data is sorted by name. The table shows 145 items in total, with the first 10 items visible on the first page.

Type	Category	Name	Price
Clinic Procedure	CO2 Laser Sessions	3-Session Package	\$500.00
Clinic Procedure	Laser Hair Removal Single Areas	Abdomen	\$50.00
Clinic Procedure	Body Body Morpheus8	Abdominal	\$500.00 - per session
Hospital Surgery	Body Body Contouring	Abdominoplasty	Consultation required
Clinic Procedure	Body Body Morpheus8	Arms	\$350.00 - per session
Clinic Procedure	Creams Standard	Beclean	\$20.00
Clinic Procedure	Laser Hair Removal Single Areas	Bikini	\$40.00
Hospital Surgery	Face Eye Surgery	Blepharoplasty (Lower)	Consultation required
Hospital Surgery	Face Eye Surgery	Blepharoplasty (Upper)	Consultation required
Clinic Procedure	Body Body CO2 Laser	Body Area	\$250.00
Clinic Procedure	Creams Standard	Boost C	\$35.00
Clinic Procedure	Creams Standard	Boost Eye	\$30.00
Clinic Procedure	Creams Standard	Boost Glow	\$35.00
Clinic Procedure	Creams Standard	Boost Lift	\$35.00
Clinic Procedure	Creams Standard	Boost Moist	\$30.00

Page 1 of 2

Services > Procedures is the clinic's price list, sorted by name, with Type and Category columns.

- **Procedures:** each procedure has a name, a price and an optional price note, a type, a category, what it includes, remarks and an Active setting, plus its allergy conflicts and pricing history.
- **Types:** broad service groups used for organization and reports.
- **Categories:** more specific groups; a category can sit under a parent category.
- **Pricing:** changing a price adds a row to Pricing History; the Current badge marks the price in use.

Catalog discipline: Before creating a new product, procedure, category, allergy or medicine, search for an existing item with a different spelling. Duplicate catalog entries make reporting and safety checks less reliable.

CHAPTER 6

Team and HR

Manage employees, weekly schedules, requests, salaries, payments, and holidays.

Employees and My Profile

The screenshot shows the 'Team > Employees' page in the Zeal Clinic system. The left sidebar contains a navigation menu with options like Dashboard, Clinical, Schedule, Patients, Business, Suppliers, Financials, Team (selected), Catalog, Inventory, Services, System, Reports, Settings, and Connection. The main content area has a search bar and tabs for 'Employees' and 'Holidays'. Below the tabs is a table of employees with columns: Name, Contact, Email, Role, and Type. The table lists six employees: Julian Vance (Plastic Surgeon, Full-time), Laura Hayes (Dermatologist, Full-time), Thomas Mercer (Laser Technician, Full-time), Margaret Owens (Nurse, Full-time), Rachel Sterling (Receptionist, Part-time), and Simon North (Accountant, Part-time). There are buttons for 'Prepare Salaries' and '+ New' at the top right of the table.

Name	Contact	Email	Role	Type
Julian Vance	+1 555 0101	julian.vance@example.org	Plastic Surgeon	Full-time
Laura Hayes	+1 555 0102	laura.hayes@example.org	Dermatologist	Full-time
Thomas Mercer	+1 555 0103	thomas.mercer@example.org	Laser Technician	Full-time
Margaret Owens	+1 555 0104	margaret.owens@example.org	Nurse	Full-time
Rachel Sterling	+1 555 0105	rachel.sterling@example.org	Receptionist	Part-time
Simon North	+1 555 0106	simon.north@example.org	Accountant	Part-time

Team > Employees, with Prepare Salaries and New.

- **Team > Employees:** managers add and edit employees: name, role, employment type, contact, email and date of birth. New can also create the person's staff account at the same time (Create Staff Account).
- **Employee record:** shows the details, the weekly schedule, salaries, payments, prepared salaries and assigned appointments. User Account opens the linked staff account when permitted.
- **My Profile:** each linked employee sees the same record for themselves, read-only apart from schedule requests.

Weekly schedule

The screenshot shows the Zeal Clinic interface for an employee record. The left sidebar contains navigation links: Dashboard, Clinical (Schedule, Patients), Business (Suppliers, Financials, Team), Catalog (Inventory, Services), and System (Reports, Settings, Connection). The main content area is titled 'Employee' and shows the record for 'Julian Vance'. It includes a search bar, a 'Quick Action' button, and links for 'User Account', 'Edit', and 'Delete'. The 'Details' section shows contact information (+1555 0101), email (julian.vance@example.org), and date of birth (1978-04-12). The 'Schedule' section shows a calendar view for September 2026, with a color legend for Working (green), Overtime (blue), Time off (red), Holiday (yellow), and Pending request (grey). The schedule shows shifts for Georgia Carter on Monday and Victoria Palmer/Harriet York on Tuesday.

The Schedule card on an employee record: one week, Monday to Sunday, with a color legend.

1. **Open an employee record.** The Schedule card shows one week, Monday to Sunday. Use the arrows to move between weeks, or Table for a list of the week.
2. **Edit regular hours.** Managers select an hour cell and choose Add shift or Edit schedule, then enter the shifts. Choose Apply starting on this date when the hours are changing, or Update the existing schedule when they were entered wrong.
3. **Request time off or overtime.** Select an hour cell and choose Request time off (inside a shift) or Request overtime (outside one). Set the dates, the times (required for overtime, optional for time off) and notes, then select Submit Request.
4. **Review the status.** Requests start as pending. A manager opens one to Accept, Reject or Mark Pending. The legend explains the colors: Working, Overtime, Time off, Holiday and Pending request.

Schedule requests: Pending requests do not have the same effect as accepted changes. Check the status before assuming a shift, time-off period, or overtime block is approved.

Salaries, payments, and holidays

Salaries and prepared salaries

- **Salaries:** add a salary with its amount, effective date and notes. Use Toggle Active in the row's ... menu to mark which salary is current.
- **Prepare Salaries:** from Team > Employees, select Prepare Salaries, choose Period Start and Period End, add notes if needed and select Prepare. The app posts one entry for each employee with an active salary and shows the result.
- **Prepared Salaries:** review each period's base amount, adjustment, prepared amount and date. Authorized managers can use Edit Adjustment: positive values add, negative values deduct.
- **Employee payments:** record payments to the employee (cash, card or transfer) with the plus in Payments, then check the balance.

Holidays

Team > Holidays lists the clinic's holidays and their dates.

1. **Open Team > Holidays and select New.** Enter the holiday name and its start and end dates (both included).
2. **Add notes and select Add Holiday.** The holiday shows on the calendar and in every staff schedule.
3. **Edit or delete only after checking schedules.** Select a holiday to edit it. Changing a holiday can affect working-hour calculations.

CHAPTER 7

Dashboard, reports, and connection

Use current information to run the clinic and share only what is appropriate.

Dashboard

The dashboard in dark mode: Financial, Patients and Operations figures for the chosen dates.

- **Date range:** set From and To (the last 30 days to start with) to update the range-based cards.
- **Financial / Patients / Operations:** read totals and changes for the selected period.
- **Other cards:** review demographics, appointment status, inventory, revenue and payment mix, referral sources, staff performance, top procedures and products, room utilization, today's appointments and recent transactions.
- **Customize:** show or hide cards on your own dashboard; Show all restores them.
- **Print:** generate the dashboard report PDF when your role has all the required access.

Reports

The screenshot shows the Zeal Clinic Reports interface. The left sidebar contains navigation links: Dashboard, Clinical (Schedule, Patients), Business (Suppliers, Financials, Team), Catalog (Inventory, Services), and System (Reports). The main area is titled 'Reports' and has a search bar. Below the search bar are tabs for 'Revenue' and 'Expenses'. The 'Revenue' tab is active, showing a date range filter (From: 30/08/2026, To: 29/09/2026) and a 'Group by' dropdown set to 'Item kind'. A 'Print' button is visible. The 'Revenue Report' table displays the following data:

Item Kind	Qty	Amount	%
Procedures	86	22,122.75	87.3
Products	41	3,229.65	12.7
Total	127	25,352.40	100.0

The Revenue report for a date range, grouped by item kind.

1. **Open Reports.** Choose Revenue or Expenses.
2. **Set the date range.** Revenue can also be grouped by item kind, procedure type or category, individual procedure, product category or product, other items, or discounts.
3. **Review the totals.** Revenue shows quantity, amount and percentage; Expenses lists supplier purchases and expense payments with what is still owed.
4. **Select Print.** A PDF opens for saving or printing.

Notifications and connecting another device

Notifications

The screenshot shows a notifications panel with two alerts. The first alert is 'Low stock: Hyaluronic Acid Cream' with the message 'Quantity 0 at or below min threshold 5.' and '1m ago'. The second alert is 'Appointment scheduled' with the message 'Eleanor Foster is scheduled for today at 16:00.' and '1m ago'. The panel also includes a 'Mark all read' link and a '+ Quick Action' button. In the background, a dashboard is visible with various metrics like Profit (\$10,123, +7.0%), Discounts (-0.0%, +0.0%), and Receivables (\$22,194).

The bell lists alerts; unread ones are highlighted.

- **Bell badge:** shows how many unread notifications are waiting.

- **What you are told:** an appointment starting in 30 minutes, a product at or below its minimum stock, and, at clinics that keep a cloud copy, a failed data sync. New alerts also pop up briefly on screen.
- **Open a notification:** selecting it marks it read.
- **Mark all read:** clears the unread state for the whole list.
- **Delete:** use the small X (it appears when you point at an alert) when it is no longer needed.

Connection

Connection shows the server address and a QR code. Another device on the same clinic network can scan the code or copy the Server URL to open Zeal Clinic.

1. **Open Connection.** This page is available to all signed-in users.
2. **Keep the other device on the same network.** Scan the QR code or copy the Server URL.
3. **Sign in on the other device.** Use that staff member's own account.

Protect the clinic address: Do not post the QR code or server URL publicly. Use it only with approved clinic devices and networks.

CHAPTER 8

Administration

These screens are for clinic managers and authorized administrators.

Staff accounts

The screenshot shows the Zeal Clinic user interface. On the left is a sidebar menu with categories: Clinical (Dashboard, Schedule, Patients), Business (Suppliers, Financials, Team), Catalog (Inventory, Services), and System (Reports, Settings, Connection). The 'Settings' option is highlighted. The main content area is titled 'Settings' and contains a search bar and a '+ Quick Action' button. Below this is a tabbed interface with 'Staff', 'Roles', 'Audit Log', and 'About'. The 'Staff' tab is active, displaying a table of staff accounts. The table has columns for Username, Display Name, Role, and Status. There are four staff members listed, all with an 'Active' status badge. A '+ New' button is located at the top right of the table.

Username	Display Name	Role	Status
jvance	Dr. Julian Vance	admin	Active
thayes	Dr. Laura Hayes	nurse	Active
tmercerc	Thomas Mercer	staff	Active
mowens	Margaret Owens	nurse	Active

Settings > Staff lists every staff account with its role and status.

1. **Open Settings > Staff and select New.** Enter the username, display name, role (Admin, Staff or Nurse) and a password. If you leave the password empty, the first password used to sign in becomes the account's password.
2. **Use a unique username.** A username can't be changed later; never share one account between staff members.
3. **Open a staff record.** Edit the display name, role or password, select the Active badge to deactivate or reactivate the account, and review its Actions history.
4. **Deactivate promptly.** A deactivated account is signed out at once and can't sign in again until it is reactivated.

Roles and permissions

Zeal Clinic
Dr. Julian Vance

Role

Search...

+ Quick Action

Staff

Details

Name: staff

Label: Staff

Permissions

35 of 82 selected

RESOURCE	Read	Write	Delete
Allergies	☒	☐	☐
Analytics	☒	☐	☐
Appointments	☒	☒	☒
Audit	☐	☐	☐
Balances	☒	☐	☐
Cloud Restore	☐	☐	☐
Currencies	☒	☐	☐
Discounts	☒	☒	☐
Employees	☐	☐	☐
Employee Payments	☐	☐	☐
Employee Salaries	☐	☐	☐
Employee Schedules	☐	☐	☐
Expenses	☒	☒	☐
HR	☒	☐	☐
Invoices	☒	☒	☐
Medicines	☒	☐	☐
Patients	☒	☒	☐

A role's permission matrix: one row per area of the app, with Read, Write and Delete.

Roles control what each account can read, create or change, and delete. Open a role under Settings > Roles, tick or clear boxes in its permission matrix, then select Save Changes (Reset discards your changes). Selecting a column heading or an area's name toggles the whole column or row.

- **Read:** see the area or section.
- **Write:** create or change records and use related actions.
- **Delete:** remove records where the area supports deletion. Write and Delete need Read on the same area.

Least access: Give each role only the access needed for its work. After a role changes, affected staff see their menus update within moments (the app shows "Updating permissions").

Audit, updates, and cloud sync

Audit Log

Time ↕	Staff	Role	Action ↕	Entity
2026-09-29 13:52:55	jvance	admin	create	patients #079757cb
2026-09-29 13:52:55	tmerc	staff	update	appointments #b70309f2
2026-09-29 13:52:55	lhayes	nurse	create	patients/allergies #079757cb
2026-09-29 13:52:55	jvance	admin	delete	patient-allergies #0650e425
2026-09-29 13:52:55	jvance	admin	delete	patients #079757cb

The Audit Log records who changed what, and when.

Settings > Audit Log lists every change saved in the app: the time, the staff member and role, the action (create, update or delete) and the record it touched, shown by its type and the start of its ID. Use Search, or Filter for a date range, when investigating a change.

About and updates

Settings > About shows the installation date, the update status and, at clinics that keep a cloud copy, Force sync.

1. **Open Settings > About.** It shows the installed version and date, and whether an update is available.
2. **Coordinate with staff.** Make sure nobody is in the middle of a task.

3. **Select Update, then Update now.** The app restarts and is unavailable for a couple of minutes; anyone who tries to save meanwhile sees “Update in progress, please wait”.
4. **Sign back in and check.** Confirm the new version and a normal workflow after the update.

Staff without update permission see “An update is available. Ask an administrator to install it.”

Force sync

Clinics that keep a cloud copy of their data see a Cloud synchronization section on the clinic server's About page. Force sync overwrites the cloud copy with this clinic's data. It is a high-impact recovery action, not a routine refresh, and it can't be undone; a progress panel follows each step.

Administrator approval required: Use Force sync only under the clinic's recovery procedure and after confirming nobody is editing data. If the reason for using it is unclear, stop and contact the system administrator.

CHAPTER 9

Help and safe daily use

Solve common interface problems and protect clinic information.

Common problems

What you see	What to do
Cannot sign in	Check the username, password and Caps Lock. “Invalid username or password” means one of them is wrong or the account is inactive; ask an administrator. After several failed tries, wait a moment (“Too many login attempts”).
Asked to sign in again	Your session ended, or you opened the app in a new tab. Sign in again; each tab signs in on its own.
Section or button is missing	Your role probably does not include that permission (“You don't have permission”). Ask an administrator; do not use another account.
Create / Save is disabled	Complete every field marked with an asterisk, choose required dropdown values, and correct date, time or amount errors.
“This room is already booked for that time”	Choose another room or time. Check Day view to see the clash.
“Can't delete ... while it's in use”	Other records still depend on this one, for example a patient with appointments or payments. Keep it and correct it with Edit instead.
“Not enough stock for ...”	The invoice sells more than is in stock. Check the quantity, or record the supplier invoice for the new stock first.
“Please check your input”	A value is missing or not valid. Review the form, especially dates, amounts and required fields.
Search returns nothing	Try a shorter part of the name or phone number. Search shows only the kinds of records your role can open, up to five matches of each.
Balance looks reversed	Remember In and Out are shown from the patient's, supplier's or employee's perspective. Check the transaction rows and amount signs.
PDF does not appear	Allow pop-ups for the app. If the browser blocks the new tab, the PDF is downloaded as document.pdf instead. Retry once, then contact the administrator.
Connection page does not work on another device	Confirm both devices use the same approved network and scan the current QR code again.
“Update in progress, please wait”	Wait a few minutes after an approved update, then refresh and sign in again.

Before deleting anything

1. **Confirm the exact record.** Check the name, date, invoice number or amount.
2. **Understand what it affects.** Invoices can affect stock and balances; holidays affect schedules; payments affect balances.
3. **Use Edit when the record should remain.** Delete only when removal is the approved correction.
4. **Read the confirmation.** Select Cancel if any detail is uncertain. If the app answers “Can't delete ... while it's in use”, other records depend on this one: that is protection, not a fault.

End-of-shift checklist

- **Appointments:** Scheduled, In-Progress, Completed, Cancelled and Rescheduled statuses match what actually happened.
- **Clinical records:** allergies, medicines, prescriptions and completion notes were entered in the correct patient record.
- **Billing:** every completed billable visit has the correct invoice; received money has a separate payment record.
- **Stock:** product quantities changed through the correct patient or supplier invoice.
- **Alerts:** important notifications were read and acted on.
- **Privacy:** no patient information or printed reports are left visible.
- **Account:** log out before leaving a shared device.

When unsure: Stop before saving a high-impact change. Check the patient, date, amount and action with the responsible clinician, finance lead or administrator.

Quick action summary

Need to...	Go to...
Find a person or item	Search in the top bar
Add a patient	Quick Action > New Patient, or Patients > New
Book a visit	Quick Action > New Appointment, an empty hour in Day view, or the patient record's Appointments plus
Start or finish a visit	Schedule > open the appointment > status badge
Invoice a patient	Quick Action > New Invoice, or the patient record's Invoices plus

Need to...	Go to...
Record money received	Patient record > Payments plus
Print an invoice	Financials > Invoices > open the invoice > Print PDF
Print a report	Dashboard > Print, or Reports > Print
Adjust screen size	Staff menu (your initials) > Scale
Use another clinic device	Connection > scan the QR code or copy the Server URL
Sign out	Staff menu (your initials) > Logout
